

# New cooperation with the University of Zaragoza

Ensuring best of class engineering.

Alimak Group's wind division, representing the Avanti brand has been working close with the University of Zaragoza for years with great success, especially on activities with internship programs and target solutions in technical developments for the expanding wind market.

The common activities between the University of Zaragoza and the Avanti Brand have proven to be very fruitful both in terms of product development and serving the wind industry in general with new inventions and state of the art solutions.

Both parties have therefore agreed to move forward with a more stable agreement ensuring the development of know-how and synergies between scientific research, trends in the market, industry experiences, research and development that will benefit both parties in the agreement.

We are pleased to announce a 2-year new agreement which was signed on the 27<sup>th</sup> of January 2023. The cooperation establishes that the University of Zaragoza and the Alimak Group's division will increase the focus of contributing to the education paths of the students of engineering providing insights of working in a company. Also increase knowledge sharing, mentoring of the students before starting to work.

Avanti sees huge possibilities in the cooperation with the university with enhanced focus on the engineering school and includes R&D activities including internship programs, projects,

technical assistance, training, master thesis and PhDs on topics promoted by Avanti and Alimak Group in the areas of product development.

## **About the university of Zaragoza**

The University of Zaragoza, founded in 1542, is the main center of technological innovation in the Ebro Valley and has great prestige among the group of both Spanish and European universities it has relations with. It offers more than 100 educational paths and has more than 27.000 students.
